Staff support 'flu free' call

There was an overwhelming response by staff to the annual flu vaccination program - hundreds lined up to become 'flu free' at the official launch. Now other staff, unable to be there yesterday, need to respond so that we reach our target of 60 per cent 'flu free' staff. Only at that level of vaccination can we be confident that our collective immunity will stop influenza getting a hold in our families, our hospital and our community. Our Infection Control Coordinator Wendy Calnan said we are aiming to increase the percentage of staff vaccinated this year. If you haven't had your vaccination then telephone 0414362036 and the mobile vaccination unit will visit your office.

THANK YOU TO ALL STAFF WHO ARE 'FLU FREE'

WELL DONE ALL ROUND - Nurses, doctors, allied health staff. management - all joined in to become 'flu free'.
